

## Zinc Die Casting Conference -- Ningbo, China

### Newest Technologies and How to Minimize Die Casting Costs

#### ----- International Zinc Association

Come and learn about the latest zinc die casting production technologies and how these can help you to lower your cost of production. The newest die design, surface finishing and alloy composition control technologies will be presented. New alloys are now available. One has ultra-fluidity, allowing thinner castings to be produced. Another alloy has greatly improved high temperature capabilities, opening new application possibilities. New metal-saving zinc composites technology that also improves user properties will be presented. The latest electronic property databases to assist designers will be shown.

Also, a visit will be made to the die casting plants of **Ningbo Dingxin Alloys** and **Genesis Alloys**, where we will see two of the biggest diecasting plants in China.
